Junior Mystery Collection

Book Five - History comes alive

Midnight at the Museum

by Daniel Teo | Illustrated by Priya Shah

When the clock strikes twelve, every exhibit has a story to tell.

Follow Sam and Elise through hidden galleries as they search for a missing medal before the museum opens in the morning.

Includes a map and fact pages

Book Review

Midnight at the Museum begins when Sam and Elise are accidentally locked inside a history museum. Soon, they hear footsteps and discover that a valuable medal has disappeared from its case.

The author mixes clues with interesting facts about early Singapore. A map at the front helps readers follow the children's route through the galleries, while short fact pages explain the real objects mentioned in the story.

The mystery is solved fairly, as all the important clues appear before the final chapter. Readers who enjoy puzzles and history will probably want to read the book more than once.

Section I: Comprehension Open-ended**(20 marks)**

Read the passage and answer questions 66 to 75.

Mr Chen ran a busy bakery and often reminded his daughter, Lila, not to rush through every task. Lila believed that speed was the best way to succeed. To help her learn patience, Mr Chen sent her to Madam Lee, an elderly lantern maker who lived across the river.

- 5 Lila was eager to finish quickly and left at once. Rain clouds gathered as she crossed the bridge, but she kept running. At Madam Lee's workshop, she explained that her father wanted her to learn the secret of careful work.

Madam Lee lit a small lantern and asked Lila to carry it back to the bakery without letting the flame go out. Lila held it tightly and raced into the rain. She ignored a cyclist who had fallen beside the road and pushed past people sheltering under a narrow roof.

- 10 A strong gust entered the lantern and extinguished the flame. Frustrated, Lila returned to the workshop. Madam Lee listened quietly and relit the lantern. This time, she advised Lila to walk steadily, protect the flame and notice the people around her.

On her second journey, Lila shared her umbrella with a child and helped the cyclist lift his bicycle. She moved carefully, shielding the lantern whenever the wind grew stronger. Although the journey took longer, the flame continued to glow.

When Lila reached the bakery, Mr Chen was waiting at the door. Madam Lee had followed at a distance and now joined them. She explained that steady hands protected the flame, while a generous heart made the journey worthwhile.

- 15 Lila looked at the glowing lantern and understood the lesson. She had been so focused on arriving first that she had failed to see those who needed help. Patience had allowed her to complete the task, and kindness had made her useful to others.

From then on, Lila worked more carefully in the bakery. She measured ingredients before mixing them and offered help when her father was busy. Mr Chen no longer had to remind her that good work should never be rushed.
