**Total: 90 marks**  
(Booklet A + Booklet B)

INSTRUCTIONS TO CANDIDATES:

1. Do not begin until you are told to do so.
2. Follow all instructions carefully.
3. Answer all the questions.
4. Total time for Booklets A and B: 1 hour 50 minutes.

**Section A: Grammar Multiple-choice Questions (MCQ)****(10 marks)**

For each question from 1 to 10, four options are given. Choose the correct answer and write its number in the brackets.

- 
- |           |                                                             |                 |                 |     |
|-----------|-------------------------------------------------------------|-----------------|-----------------|-----|
| <b>1</b>  | The collection of shells _____ displayed near the entrance. | (1) is          | (2) are         |     |
|           |                                                             | (3) were        | (4) have        | ( ) |
| <b>2</b>  | "Your parents will attend the meeting, _____ they?"         | (1) will        | (2) won't       |     |
|           |                                                             | (3) do          | (4) don't       | ( ) |

|           |                                                             | (3) much        | (4) any         | ( ) |
| <b>6</b>  | Ms Devi _____ the seedlings before leaving the greenhouse.  | (1) waters      | (2) watered     |     |
|           |                                                             | (3) had watered | (4) has watered | ( ) |
| <b>7</b>  | _____ the tide is low, visitors may walk to the sandbar.    | (1) When        | (2) Unless      |     |
|           |                                                             | (3) Although    | (4) Whereas     | ( ) |
| <b>8</b>  | You _____ keep a safe distance from wild animals.           | (1) must        | (2) could       |     |
|           |                                                             | (3) might       | (4) would       | ( ) |
| <b>9</b>  | We watched the rescue boat _____ towards the island.        | (1) speed       | (2) speeds      |     |
|           |                                                             | (3) sped        | (4) has sped    | ( ) |
| <b>10</b> | Every one of the bags _____ checked before departure.       | (1) were        | (2) are         |     |
|           |                                                             | (3) was         | (4) have been   | ( ) |

**Section B: Vocabulary Multiple-choice Questions (MCQ)****(5 marks)**

For questions 11 to 15, choose the most suitable answer and write its number in the brackets.

- 
- 11** The doctor gave clear \_\_\_\_\_ on how to care for the wound.  
 (1) instructions (2) inventions  
 (3) interruptions (4) introductions ( )
- 12** The damaged bridge was \_\_\_\_\_ after engineers inspected it.  
 (1) reopened (2) repeated  
 (3) replaced (4) rejected ( )
- 13** The team tried to \_\_\_\_\_ the trapped turtle from the net.  
 (1) release (2) remove  
 (3) reduce (4) refuse ( )
- 14** The campaign aims to \_\_\_\_\_ awareness of food waste.  
 (1) raise (2) rise  
 (3) arise (4) reach ( )
- 15** The rescue workers remained calm \_\_\_\_\_ the emergency.  
 (1) in the face of (2) at the end of  
 (3) on behalf of (4) by means of ( )
- 

**Section C: Vocabulary Cloze****(5 marks)**

Choose the option closest in meaning to each capitalised word in the passage.

Marine biologists are **RESTORING** damaged coral reefs. First, they collect healthy **FRAGMENTS** and attach them to special frames. The young corals **GRADUALLY** develop and form larger colonies. Divers regularly **INSPECT** the frames and remove algae that may compete for space. Over time, the restored area **ATTRACTS** fish and other sea creatures.

- 16. restoring** (1) repairing (2) measuring (3) discovering (4) avoiding ( )
- 17. fragments** (1) small pieces (2) living animals (3) deep holes (4) bright colours ( )
- 18. gradually** (1) suddenly (2) slowly (3) carelessly (4) equally ( )
- 19. inspect** (1) examine (2) replace (3) count (4) carry ( )
- 20. attracts** (1) draws (2) frightens (3) feeds (4) hides ( )

**Section D: Visual Text Comprehension****(5 marks)**

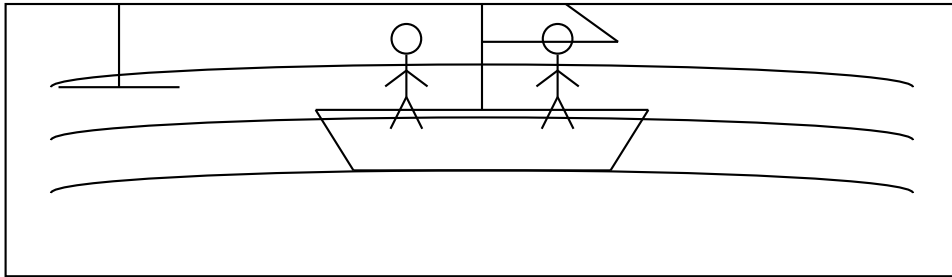

Study Text 1 and Text 2 carefully, then answer questions 21 to 25 on the next page.

**Ocean Guardians**

Book Four - Courage beyond the shore

**The Island Rescue**

by Melissa Goh | Illustrated by Arun Das

*The storm has passed, but the real challenge has just begun.*

Three friends, one damaged radio and a race against time to help animals stranded on a small island after a powerful storm.

**Includes ocean safety tips**

**Book Review**

The Island Rescue begins after a storm separates three friends from their school group. While waiting for help, they discover injured seabirds and a turtle trapped among fishing lines.

The plot moves quickly, but the characters make sensible decisions rather than taking unnecessary risks. Short safety notes explain why they stay together, signal from an open area and avoid entering rough water.

The story also presents environmental problems without sounding like a textbook. Readers see how discarded plastic and fishing lines harm wildlife, and how teamwork can make a practical difference.

**Section D: Visual Text Comprehension - Questions****(5 marks)**

For each question, choose the best answer and write its number in the brackets.

- 
- 21** What problem do the friends face at the beginning?
- |                                     |                                                        |       |
|-------------------------------------|--------------------------------------------------------|-------|
| (1) They lose a school competition. | (2) They are separated from their group after a storm. |       |
| (3) They cannot find an island map. | (4) They damage a rescue boat.                         | (   ) |
- 22** Why are safety notes included?
- |                                                 |                                        |       |
|-------------------------------------------------|----------------------------------------|-------|
| (1) To explain the characters' sensible actions | (2) To make the story more frightening |       |
| (3) To advertise swimming lessons               | (4) To replace parts of the plot       | (   ) |
- 23** Which statement best describes the characters?
- |                                           |                                       |       |
|-------------------------------------------|---------------------------------------|-------|
| (1) They take unnecessary risks.          | (2) They wait without helping anyone. |       |
| (3) They act carefully and work together. | (4) They ignore all safety advice.    | (   ) |
- 24** How does the book teach readers about environmental problems?
- |                                      |                                                     |       |
|--------------------------------------|-----------------------------------------------------|-------|
| (1) By listing facts only            | (2) By showing how waste harms animals in the story |       |
| (3) By focusing on weather forecasts | (4) By describing different school subjects         | (   ) |
- 25** What is one likely purpose of the book?
- |                                                               |                                         |       |
|---------------------------------------------------------------|-----------------------------------------|-------|
| (1) To entertain readers while encouraging responsible action | (2) To prove that storms are harmless   |       |
| (3) To teach readers to repair radios                         | (4) To discourage all visits to islands | (   ) |

**Section E: Grammar Cloze****(10 marks)**

Choose the most suitable word from A to O for each blank. Each word can be used only once. Five words are not used.

|          |          |            |             |            |
|----------|----------|------------|-------------|------------|
| (A) at   | (B) away | (C) before | (D) because | (E) during |
| (F) for  | (G) from | (H) in     | (I) of      | (J) by     |
| (K) that | (L) than | (M) to     | (N) while   | (O) with   |

Food waste occurs when edible food is thrown away instead \_\_\_\_\_ (26) being eaten. This can happen \_\_\_\_\_ (27) people buy more than they need or forget what is stored \_\_\_\_\_ (28) the refrigerator. Planning meals \_\_\_\_\_ (29) shopping helps reduce waste. Make a list and check what you already have \_\_\_\_\_ (30) home. Store food properly so that it stays fresh \_\_\_\_\_ (31) longer. Leftovers can be used \_\_\_\_\_ (32) prepare another meal, provided they have been kept safely. Pay attention to date labels, but remember \_\_\_\_\_ (33) some foods may still be suitable to eat after a 'best before' date. \_\_\_\_\_ (34) reducing waste, families save money and lower the amount of rubbish sent \_\_\_\_\_ (35) for disposal.

Score: /10

**Section G: Comprehension Cloze****(15 marks)**

Fill in each blank with a suitable word. Use one word for each blank.

Elephants are the largest land animals on Earth. They live in family \_\_\_\_\_ (46) led by an experienced female called the matriarch. She remembers where to find water and safe \_\_\_\_\_ (47), especially during dry seasons. Elephants communicate through calls, touch and very low sounds that can travel over long \_\_\_\_\_ (48). Their trunks are extremely useful. An elephant uses its trunk to breathe, smell, drink, pick up food and even \_\_\_\_\_ (49) other elephants. Large ears help release body \_\_\_\_\_ (50) in hot weather. Elephants spend much of the day eating grass, leaves, bark and \_\_\_\_\_ (51). As they move, they spread seeds and create paths used by other animals. For this reason, they are important to the health of their \_\_\_\_\_ (52). However, elephants face threats from habitat loss and illegal \_\_\_\_\_ (53). Farms and roads may block traditional travel routes, leading to conflict between elephants and \_\_\_\_\_ (54). Conservation groups work with communities to protect corridors and reduce crop \_\_\_\_\_ (55). Some use fences, warning systems and safer storage methods. Protecting elephants requires patience because both wildlife and people need enough \_\_\_\_\_ (56) and resources. Tourists can help by choosing responsible operators and never buying products made from \_\_\_\_\_ (57). Scientists also track elephant movements to understand where protection is most \_\_\_\_\_ (58). When communities, governments and researchers cooperate, elephant populations have a better chance to \_\_\_\_\_ (59). Their survival protects many other species that share the same \_\_\_\_\_ (60).

**Section I: Comprehension Open-ended****(20 marks)**

Read the passage and answer questions 66 to 75.

Mr Kapoor owned a successful plant nursery, but his son, Kiran, expected every result to come quickly. He became impatient when seeds did not sprout at once and often changed his plans. To teach him perseverance, Mr Kapoor sent him to Ms Devi, a botanist who cared for a large greenhouse.

5 Kiran arrived early and announced that he was ready to learn the fastest way to grow a strong plant. Ms Devi gave him a young seedling and asked him to care for it for one week. She provided simple instructions about light, water and soil.

Kiran wanted the seedling to grow faster, so he watered it several times a day and moved it whenever he saw a brighter patch of sunlight. He also loosened the soil repeatedly to check the roots. By the third day, the leaves had begun to droop.

Disappointed, Kiran showed the plant to Ms Devi. She explained that his constant interference had weakened it. Growth required regular care, but the plant also needed time to respond. She gave him another seedling and asked him to try again.

10 This time, Kiran followed the instructions exactly. He watered the soil only when it was dry and kept the pot in one suitable place. During a storm, he moved the seedling away from a broken window and supported its stem with a small stick.

At the end of the week, the plant was only slightly taller, but its leaves were firm and green. Kiran had expected a dramatic change, yet he felt proud because the seedling was healthy. He recorded each small improvement in a notebook.

15 Ms Devi told him that perseverance was not about forcing quick results. It meant giving steady care, noticing progress and continuing even when change was slow. 'Growth cannot be hurried; it can only be supported,' she said.

Kiran returned to the nursery and applied the lesson to his work. He planned tasks carefully, waited for results and did not abandon a project after one difficult day. His father noticed that Kiran had finally learnt to value patient effort.

*Original practice passage*

66 Why did Mr Kapoor send Kiran to Ms Devi?
