

Primary 5 Mathematics Practice Sheet

Name: _____

Class: _____

Date: _____

1. Alice ate $\frac{1}{8}$ of a cake. Her brother ate $\frac{3}{8}$ of the same cake. What fraction of the cake did they eat altogether?

2. Mr. Tio spent $\frac{1}{12}$ of his salary on food and $\frac{1}{8}$ of it on transport. What fraction of his salary did he spend altogether?

Primary 5 Mathematics Practice Sheet

Name: _____

Class: _____

Date: _____

3. $\frac{5}{8}$ of the books on a bookshelf are English books. $\frac{1}{16}$ of them are Malay books. The rest are Chinese books. What fraction of the books on the bookshelf are Chinese books?

4. Gary used $\frac{5}{8}$ m of ribbon to tie a box and $\frac{1}{4}$ m of ribbon to make a bow. How much more ribbon was used to tie the box than to make the bow?

Primary 5 Mathematics Practice Sheet

Name: _____

Class: _____

Date: _____

5. A man left $\frac{1}{5}$ of his money to his wife, $\frac{1}{3}$ of his money to his daughter, and the remainder to his son. What fraction of his money was given to his son?

6. Joey took $\frac{5}{6}$ h to travel from his home to the zoo. He took $1\frac{1}{3}$ h to travel from his home to the bird park. How much longer did he take to travel to the bird park than to the zoo?

Primary 5 Mathematics Practice Sheet

Name: _____

Class: _____

Date: _____

7. Jane helped her mother for $\frac{1}{4}$ h in the morning and $1\frac{5}{8}$ h in the afternoon. How much time did she spend helping her mother in a day?

8. A container has a capacity of $4\frac{1}{3}$ litres. It contains $3\frac{5}{6}$ litres of water. How much more water is needed to fill the container?

Primary 5 Mathematics Practice Sheet

Name: _____

Class: _____

Date: _____

9. Mrs. Ting bought $1\frac{1}{4}$ kg of fish, $2\frac{1}{8}$ kg of vegetables, and $1\frac{1}{2}$ kg of meat at the market. How many kilograms of food did she buy?

10. Edward planned to spend $4\frac{2}{3}$ h painting the walls of his house. He finished the painting in $3\frac{5}{9}$ h. How much earlier did he finish the painting?

Primary 5 Mathematics Practice Sheet

Name: _____

Class: _____

Date: _____

11. Mr. Chen had \$750. He spent $\frac{3}{5}$ of the money on a DVD player. Find the cost of the DVD player.

12. Mihui had some stamps. She gave $\frac{3}{8}$ of them to Jane and $\frac{1}{5}$ of the remainder to Amy. If Amy received 12 stamps, how many stamps did Mihui have at first?

Primary 5 Mathematics Practice Sheet

Name: _____

Class: _____

Date: _____

13. A number of people attended a concert. $\frac{3}{8}$ of them were men, $\frac{2}{5}$ of the remainder were women, and the rest were children. If there were 180 children, how many people attended the concert altogether?

14. There were $4\frac{1}{8}$ cakes on the table. Mary ate $1\frac{1}{4}$ cakes and Jane ate $1\frac{1}{6}$ cakes. How many cakes were left over?

Primary 5 Mathematics Practice Sheet

Name: _____

Class: _____

Date: _____

15. A container has a capacity of $5\frac{1}{2}$ litres. It contains $2\frac{5}{6}$ litres of water. John pours another $1\frac{1}{3}$ litres of water into it. How much more water is needed to fill the container?

16. Mary spent $\frac{2}{9}$ of her money on a storybook, $\frac{1}{6}$ of it on a stamp album, and $\frac{1}{3}$ of it on food and transport.

(a) What fraction of her money did she spend altogether?

(b) What fraction of her money did she have left?

Primary 5 Mathematics Practice Sheet

Name: _____

Class: _____

Date: _____

17. Mrs. Ang bought $1\frac{3}{5}$ kg of meat and $1\frac{1}{2}$ kg more fish than meat. How many kilograms of food did she buy altogether?

18. Mrs. Wang bought $6\frac{3}{8}$ kg of flour. She used some of it to bake two cakes, using $1\frac{3}{4}$ kg of flour for each cake. How much flour did she have left?

Primary 5 Mathematics Practice Sheet

Name: _____

Class: _____

Date: _____

19. After making four blouses, each using $\frac{7}{8}$ m of cloth, Mrs. Lim had $1\frac{3}{4}$ m of cloth left. How much cloth did she have at first?

20. A tin of chocolates has a mass of $4\frac{2}{5}$ kg and a tin of coffee powder has a mass of $\frac{1}{2}$ kg less than the mass of the tin of chocolates. What is the total mass of the two tins?
