

Primary 5 Mathematics Practice Worksheet

Name: _____

Class: _____

Date: _____

1. Two boys sat for a Mathematics quiz. Mazzy scored $\frac{4}{5}$ of what Henry scored. If Mazzy scored 76 marks, what was their total score?

2. Corinne had some stamps. She gave $\frac{3}{8}$ of them to Elvin and $\frac{2}{5}$ of the remainder to Joey. If Elvin received 24 more stamps than Joey, how many stamps did Corinne have at first?

Primary 5 Mathematics Practice Worksheet

Name: _____

Class: _____

Date: _____

3. Mr. Wu spent $\frac{1}{8}$ of his salary on food and $\frac{1}{14}$ of the remainder on transport.

(a) What fraction of his salary had he left?

(b) If he spent \$80 on transport, find his salary.

4. Two boys, Gholin and Pifia, sat for a Mathematics quiz. Gholin scored $\frac{7}{8}$ of what Pifia scored. If Pifia scored 96 marks, how many marks did Gholin score?

Primary 5 Mathematics Practice Worksheet

Name: _____

Class: _____

Date: _____

5. A chair costs $\frac{1}{4}$ of the price of a dining table. If the dining table costs \$260, find the cost of 6 such chairs.

6. Mrs. Leong spent $\frac{1}{8}$ of her money on a dress and $\frac{1}{4}$ of it on a pair of shoes. She spent \$42 altogether. How much money did she have left?

Primary 5 Mathematics Practice Worksheet

Name: _____

Class: _____

Date: _____

7. Robert had \$240. He spent $\frac{1}{8}$ of it on a pair of shoes and $\frac{2}{7}$ of the remainder on some books. How much money did he have left?

8. Alyssa had some flour. She used $\frac{3}{5}$ of it to bake cookies on Monday and $\frac{1}{3}$ of the remainder to make bread on Tuesday. She had 16 kg of flour left. How much flour did she use altogether?

Primary 5 Mathematics Practice Worksheet

Name: _____

Class: _____

Date: _____

9. Joey and Jaiden had the same amount of pocket money at first. Joey spent $\frac{2}{5}$ of her pocket money and Jaiden spent $\frac{3}{8}$ of his pocket money. Joey spent \$30 more than Jaiden. How much pocket money did each of them have at first?

10. On Sunday, Andy jogged $3\frac{1}{2}$ km in the morning and $4\frac{1}{4}$ km in the evening. Ben jogged $2\frac{3}{4}$ km in the morning and $2\frac{2}{5}$ km in the evening. How much further did Andy jog than Ben?

Primary 5 Mathematics Practice Worksheet

Name: _____

Class: _____

Date: _____

11. The mass of a packet of sugar is 3 kg. The mass of a bag of rice is $2\frac{1}{2}$ kg more than the mass of the packet of sugar. The mass of a packet of flour is $1\frac{3}{4}$ kg less than the mass of the bag of rice. What is the total mass of the packet of sugar, the bag of rice, and the packet of flour?

12. Alvin spent $\frac{2}{5}$ of his money on a dictionary and $\frac{1}{3}$ of the remainder on 3 storybooks of the same price. He then spent $\frac{1}{4}$ of the rest of his money on a file which cost \$6.

(a) How much money did he have at first?

(b) Find the cost of each storybook.

Primary 5 Mathematics Practice Worksheet

Name: _____

Class: _____

Date: _____

13. Goh Liang spent $\frac{1}{9}$ of his salary on food and transport and gave $\frac{3}{8}$ of the remainder to his mother. Then he saved the rest. The amount he saved was \$600.

(a) What was his salary?

(b) How much money did he give to his mother?

14. A packet of biscuits has a mass of $\frac{3}{4}$ kg and a packet of salt has a mass of $\frac{3}{8}$ kg. Find the total mass of 8 packets of biscuits and 4 packets of salt.

Primary 5 Mathematics Practice Worksheet

Name: _____

Class: _____

Date: _____

15. Mrs. Lee bought 8 pieces of white cloth, each $\frac{3}{4}$ m long, and 10 pieces of blue cloth, each $\frac{4}{5}$ m long. How much cloth did she buy altogether?

16. Henry and Timmy had a total of \$940. After Henry spent $\frac{3}{7}$ of his money and Timmy spent \$180, Timmy had $\frac{5}{8}$ as much money as Henry. How much money did Henry have at first?

Primary 5 Mathematics Practice Worksheet

Name: _____

Class: _____

Date: _____

17. Huizhen sat for her final year examinations. She scored a total of 140 marks for English and Mathematics. She scored 170 marks for Mathematics and Science. Her Science result was $1\frac{1}{2}$ times that of her English result.

(a) How many marks did she score in English?

(b) How many marks did she score in Mathematics?
