BOOKLET A AND BOOKLET B

44 questions · Source: Tao Nan School 2025

INSTRUCTIONS TO CANDIDATES

1. Do not turn over this page until you are told to do so.
2. Follow all instructions carefully.
3. Answer **ALL** questions.
4. Show your working clearly. Write your answers in the spaces provided.

NAME: _____

CLASS: PRIMARY 5 _____ DATE: _____

BOOKLET	TOTAL MARKS	MARKS OBTAINED
A	26	
B	69	
TOTAL	95	

SECTION A: Multiple-Choice Questions

For each of questions 1 to 18, four options are given. One of them is the correct answer. Make your choice (1, 2, 3 or 4) and write the correct number in the brackets provided. (26 marks)

1. What is the value of the digit 3 in 30 517?

- | | | |
|----------|------------|---------|
| (1) 30 | (2) 300 | |
| (3) 3000 | (4) 30 000 | () |

2. In the number line, what is the mixed number represented by A?

- | | |
|---------------------|---------|
| (1) $4 \frac{2}{3}$ | |
| (2) $4 \frac{3}{4}$ | |
| (3) $4 \frac{5}{7}$ | |
| (4) $4 \frac{5}{8}$ | () |

3. $70 + \frac{7}{10} + \frac{7}{100} =$ _____

- | | | |
|------------|------------|---------|
| (1) 77.07 | (2) 70.77 | |
| (3) 70.077 | (4) 70.707 | () |

4. A wheel makes 900 turns in 15 minutes. At this rate, how many turns will it make in 60 minutes?

- | | | |
|------------|------------|---------|
| (1) 60 | (2) 3600 | |
| (3) 13 500 | (4) 54 000 | () |

5. Mary had \$200. She spent \$160. What percentage of her money did she spend?

- | | | |
|---------|---------|---------|
| (1) 80% | (2) 60% | |
| (3) 40% | (4) 20% | () |

6. Which of the following is the related height of base BC?

- (1) AB
- (2) AF
- (3) BD
- (4) BE

()

7. In the figure, ABC is a straight line. Find angle k.

- (1) 52°
- (2) 62°
- (3) 118°
- (4) 128°

()

8. Find the value of $50 + (40 - 10) \div 5 \times 2$

- (1) 62
- (2) 53
- (3) 32
- (4) 8

()

9. Which of the following is NOT a net of a cube? (Options (1)–(4) are shown in the figure.)

(1)

(3)

(2)

(4)

(1) (1)

(2) (2)

(3) (3)

(4) (4)

()

10. Which pair of lines are parallel?

(1) AB and AF

(2) AB and ED

(3) BC and CD

(4) BC and FE

()

11. The bar graph shows the number of children per family in a housing estate. Find the total number of children in the housing estate.

- (1) 22
 (2) 27
 (3) 49
 (4) 53 ()
12. Arrange the following from the lightest to the heaviest: 4.6 kg, 4 kg 80 g, 4 $\frac{2}{3}$ kg.
 (1) 4 $\frac{2}{3}$ kg, 4.6 kg, 4 kg 80 g
 (2) 4.6 kg, 4 $\frac{2}{3}$ kg, 4 kg 80 g
 (3) 4 kg 80 g, 4 $\frac{2}{3}$ kg, 4.6 kg
 (4) 4 kg 80 g, 4.6 kg, 4 $\frac{2}{3}$ kg ()
13. Apples are sold at 5 for \$3.10. What is the cost of each apple?
 (1) 65¢ (2) 62¢
 (3) 55¢ (4) 52¢ ()
14. Ms Lynn had 200 markers. 40% of her markers were blue and 35% of her markers were red. The rest of her markers were green. How many green markers did she have?
 (1) 80 (2) 70
 (3) 50 (4) 25 ()
15. The table shows the number of books read by 4 children: Mabel 10, Naomi 18, Olivia ?, Penny ?. The 4 children read 100 books altogether. Olivia read 3 times as many books as Penny. How many books did Olivia read?
 (1) 54 (2) 48
 (3) 24 (4) 18 ()

16. The figure is made up of squares. The perimeter of the figure is 160 cm. What is the area of the figure?

- (1) 16 cm²
(2) 64 cm²
(3) 100 cm²
(4) 1000 cm² ()
17. Jenny had $\frac{1}{2}$ as many stickers as Rachel. After Jenny gave $\frac{1}{3}$ of her stickers to Rachel, Rachel had 140 more stickers than her. How many stickers did Rachel have in the end?
- (1) 160 (2) 168
(3) 196 (4) 245 ()

18. The pie chart shows the number of each type of burger sold by a stall during lunchtime. A total of 60 burgers is sold. Find the number of chicken burgers sold.

- (1) 5
- (2) 7
- (3) 17
- (4) 21

()

SECTION A: Short-Answer and Structured Questions

For questions 19 to 44, show your working clearly in the space provided and write your answers in the spaces given. The number of marks is shown in brackets at the end of each question. (69 marks)

- 19.** (a) Write eight million, one hundred and ten thousand and fifty-five in numerals. [2]
(b) Round 51 457 to the nearest thousand.

Ans: (a) _____

Ans: (b) _____

- 20.** (a) Find the value of $14/3 \times 6$. [2]
(b) Find the value of $5/6 - 1/4$.

Ans: (a) _____

Ans: (b) _____

- 21.** (a) Find the value of 0.64×50 . [2]
(b) Express 6.01 kilometres in metres.

Ans: (a) _____

Ans: (b) _____

- 22.** A rectangular tank is $\frac{2}{3}$ full of water as shown (15 cm by 10 cm by 30 cm). Find the volume of water in the tank, in litres.

[2]

Ans: _____

- 23.** The table shows the number of fruits sold.

[2]

Shop A: 4 apples, 11 oranges, 6 bananas.

Shop B: 8 apples, 9 oranges, 7 bananas.

Find the difference in the total number of fruits sold by Shop A and Shop B.

Ans: _____

24. ABCD is a parallelogram. Find angle m (in degrees).

[2]

Ans: _____

25. Jenny wanted to buy 9 doughnuts and 6 cupcakes but she would need \$2 more than what she had. So she bought 14 cupcakes and some doughnuts. Doughnuts cost \$3 each and cupcakes cost \$1 each. What was the greatest number of doughnuts she could have bought?

[2]

Ans: _____

26. Mdm Wong deposits \$6000 in a bank for one year. The interest rate is 2.5% per year. What is the total amount she will have in the bank at the end of one year?

[2]

Ans: _____

27. Ali bought some flowers. $\frac{2}{5}$ of them were sunflowers. $\frac{1}{4}$ of the remainder were orchids. [2]
The rest were roses. What fraction of the flowers were roses?

Ans: _____

28. Each morning, the first bus will leave a bus interchange at 5.45 a.m. A bus will leave the [2]
interchange every 15 minutes. The time taken to travel from the interchange to Johan's school
is 45 minutes. What is the latest time that Johan has to board the bus at the interchange to
reach school by 7.20 a.m.?

Ans: _____

29. The line graph shows the temperature of water in a kettle from 08 00 to 08 06. [2]
(a) What was the temperature of water at first?
(b) During which two 1-minute intervals did the temperature of water increase at the same
rate?

Ans: (a) _____

Ans: (b) _____

30. Miss Tan bought 12 boxes of rainbow cookies. Each box had 20 rainbow cookies. She [2]
also bought 90 plain cookies. She packed all the cookies equally into 6 packets. How many
cookies were there in each packet?

Ans: _____

31. ABC is an equilateral triangle and $AD = CD$. Angle $ADC = 112^\circ$. Find angle BAD. [2]

Ans: _____

32. Tom needs 100 pieces of string, each of length 75 cm, to tie parcels. String is sold in rolls [2]
of 25 m each. What is the least number of rolls of string that Tom needs to buy?

Ans: _____

33. Ms Lim bought 9 packs of milk. When calculating the total volume of milk bought, she [2]
 made a mistake by multiplying the volume of 1 pack of milk by 6 instead of 9 and got 1380 ml.
 What should be the correct total volume of milk bought, in litres?

Ans: _____

34. The line graph shows the fare a taxi company charges for the first 12 kilometres. The [2]
 table shows the additional charge for every taxi trip starting from Changi Airport: from 5 p.m.
 to before midnight on any day, \$8; all other times, \$6.
 Mrs Bala took a taxi from Changi Airport at 7 a.m. She paid \$22 for her taxi ride. What was the
 distance she travelled, in km?

The table shows the additional charge for every taxi trip starting from Changi Airport.

	Additional charge
From 5 p.m. to before midnight on any day	\$8
All other times	\$6

Ans: _____

35. The figure shows a cuboid. The area of Face A is 72 cm² and the area of Face B is 36 [3]
 cm². Face C has the same area as Face A.
 (a) What is the height of the cuboid?
 (b) What is the volume of the cuboid?

Ans: (a) _____

Ans: (b) _____

- 36.** At a fruit stall, there were 8 more honeydews than watermelons. The mass of each [3]
watermelon was 6.75 kg. It was 3.5 kg heavier than each honeydew. The total mass of the
fruits was 86 kg. How many honeydews were there?

Ans: _____

37. The price of a laptop before GST was \$1800. [4]
- (a) What was the price of the laptop after adding 9% GST?
- (b) Anna bought the laptop on sale at 20% discount from the Code Shop. As a Code Shop member, she was given a further 5% discount off the discounted price. How much did Anna pay for the laptop after adding 9% GST?

Ans: (a) _____

Ans: (b) _____

38. The pie chart shows how Raju spent his money. [4]
- (a) Raju spent \$42 on food. How much did he spend on transport?
- (b) Raju bought 8 identical pens with $\frac{4}{7}$ of the money spent on stationery. What was the cost of 1 pen?

Ans: (a) _____

Ans: (b) _____

- 39.** At first, Farah had 91 star stickers and 78 heart stickers. Then, she bought an equal number of boxes of star stickers and heart stickers. Each box of star stickers contained 5 stickers and each box of heart stickers contained 7 stickers. In the end, there were 15 more heart stickers than star stickers. How many boxes of star stickers did she buy? [3]

Ans: _____

- 40.** Tap A and tap B were turned on to fill two identical empty containers X and Y at different rates. Water flowed out of tap B at a rate that was 3 times as fast as tap A. [4]
- (a) Tap A filled container X with some water for 12 minutes. How long did it take tap B to fill container Y with the same amount of water?
- (b) In another identical set-up, Janice turned on tap A at first. After the first 10 minutes, she turned on tap B. After the next 5 minutes, containers X and Y were half filled with water. For each statement, write True, False or Not possible to tell:
- (i) After another 5 minutes, there was more water in container X than container Y.
- (ii) There were 15 l of water in container X when it was half filled.
- (iii) It took tap B 20 minutes to fill container Y to the brim.

Ans: (a) _____

Ans: (b) _____

- 41.** A box contained the same number of red, blue and green toy blocks at first. After 44 [5]
green blocks, some red blocks and blue blocks were removed, there were 122 blocks left.
There were twice as many red blocks as blue blocks left. The number of green blocks left was
18 fewer than the number of red blocks left.
(a) How many more green blocks than blue blocks were left?
(b) How many blocks were in the box at first?

Ans: (a) _____

Ans: (b) _____

42. The figure shows rectangle KLMN and triangle MOL ($OM = 20$ cm, $ML = 24$ cm). The area of MNPL is $\frac{7}{16}$ of the area of MOL and 7 times the area of PKL. [1]
 (a) What is the area of MNPL?
 (Part of the original question is not included here.)

Ans: _____

43. QRUT and QRSU are parallelograms. TUS and QUV are straight lines and $QT = QU$. [5]
 Angle $RUS = 64^\circ$ and angle $UVS = 50^\circ$.
 (a) Find angle TQU .
 (b) Find angle USV .
 (c) Choose the correct words: RSVU is a (trapezium / parallelogram) because RU (is / is not) parallel to SV and RS (is / is not) parallel to UV.

QRUT and QRSU are parallelograms. TUS and QUV are straight lines

Ans: (a) _____

Ans: (b) _____

Ans: (c) _____

- 44.** At first, Siti had 36 more apples than oranges. After selling $\frac{1}{3}$ of the apples and $\frac{1}{4}$ of the oranges, she had 92 fruits left. [5]

(a) How many fruits did Siti have at first?

(b) Siti earned 40¢ for each apple that she sold and \$1 for each orange that she sold. Did she earn more from the sale of apples or oranges? How much more?

Ans: (a) _____

Ans: (b) _____
